TITAN — S T O N E —

ENGINEERED STONE. ELEVATED DESIGN.

ABOUT THIS PRODUCT

Bold character. Architectural strength.

Titan Stone is designed to give residential and commercial exteriors a strong architectural presence, combining the depth, texture and substantial character of natural masonry with a clean, refined appearance.

Its horizontal profiles emphasize width and structure, creating long visual lines that make an elevation feel balanced and intentional. Natural-looking variations in surface texture, dimension and tone create realistic depth and shadow while giving each installation a distinctive finished appearance.

Titan Stone can define an entire facade or be used strategically on entryways, gables, garage projections, porch walls, columns and other architectural focal points. Its versatile character pairs naturally with siding, wood accents, dark metal, roofing, windows and contemporary trim.

Designed to complement modern, transitional, farmhouse and traditional architecture, Titan Stone brings together visual strength and timeless texture. The result is an exterior that feels integrated, substantial and purposefully designed - built to elevate the architecture rather than simply decorate it.

NATURAL TEXTURE / HORIZONTAL PROFILE / ARCHITECTURAL STRENGTH / TIMELESS DESIGN

TITAN ARCHITECTURAL STONE

SIERRA ROCKFACE

ROCKFACE / NATURAL SPLIT

EXTERIOR + INTERIOR

ORGANIC / TIMELESS

NATURAL TEXTURE. TIMELESS DESIGN.

SIERRA LEDGE STONE

traditional architecture a fresh, elevated presence while preserving the symmetry and familiar proportions that make the home feel timeless. The bright stone surface creates subtle depth and shadow throughout the facade, while black shutters, windows and roof accents provide crisp definition. Used across a full elevation, Titan Stone can unify multiple architectural elements into one polished exterior and create a substantial masonry-inspired appearance without overwhelming the original character of the home.

DESIGN DIRECTION

Pair with black architectural accents, warm exterior lighting and restrained landscaping for a refined high-contrast look. The neutral stone palette also works naturally with wood, metal and traditional trim details, allowing the exterior to evolve without losing its classic identity.

DESERT ROCKFACE

SANDSTONE

ROCKFACE / NATURAL SPLIT

EXTERIOR + INTERIOR

WARM / TRADITIONAL

NATURAL TEXTURE. TIMELESS DESIGN.

DESERT ROCK FACE

contemporary elevation a clean focal point and emphasizes the strong vertical geometry of the architecture. The long, linear profile creates visual width and movement, while the dimensional surface adds texture without making the facade feel busy. Dark rooflines, black window frames and neutral siding sharpen the contrast and allow the stone tower to read as a deliberate architectural feature. Titan Stone is especially effective on entry towers, garage projections and other areas designed to create depth and hierarchy.

DESIGN DIRECTION

Use the stone as a focused architectural statement and surround it with quieter materials. Black trim, warm wood doors and simple landscape forms complement the horizontal profile and help create a modern exterior that feels balanced, substantial and intentional.

EXTERIOR + INTERIOR

BOLD / NATURAL

NATURAL TEXTURE. TIMELESS DESIGN.

ALPINE LEDGE STONE

natural wood accents create a warm, high-contrast interpretation of modern farmhouse design. The stone brings weight and permanence to the exterior while its natural surface keeps the bright palette from feeling flat. Deep black rooflines and window frames outline the architecture, and exposed wood at the porch introduces warmth and an organic counterpoint. Extending Titan Stone across the main gables and entry areas creates continuity from one section of the home to the next.

DESIGN DIRECTION

Combine white stone with matte black metal, natural or lightly stained wood and simple landscaping for a clean farmhouse palette. The result is approachable but architectural - a timeless exterior with enough texture and contrast to remain visually distinctive.
